

LESSON 2-9 → Similar Right Triangles, Steepness and Rise/Run

When Right Triangles share a Steepness,
Their **Rise/Run** will always be the **Same**

The triangles
are similar!
All angles
are the
same!

$$\text{Steepness} = \frac{\text{Rise}}{\text{Run}} = \frac{3}{2} = 1.5 = \frac{6}{4} = 1.5$$

The Steepness of the line is 1.5
